

HYDRAULIC PRESSES [PYE / PYZ / PYS]

Hydraulic presses manufactured in Zeulenroda are highly customizable.

C-frame, H-frame, or four-column presses can be equipped with a wide range of optional accessories, including custom hydraulic deep-drawing systems and ram-integrated ejectors for a wide range of applications.

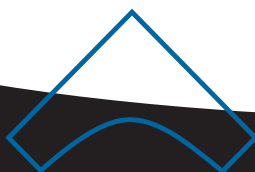

The press frames are robust welded steel constructions, providing high rigidity and an exceptionally long service life.

With in-house project planning, engineering, manufacturing, and final assembly at Zeulenroda Presstechnik, we can flexibly manage the entire project lifecycle.

Hydraulic C-frame presses, type PYE

Hydraulic H-frame presses, type PYZ

Hydraulic column presses, type PYS

Product page

Applications

- › All conventional forming processes
- › Straightening
- › Coining
- › Calibrating
- › Bulk metal forming
- › Small-batch and single-part

Technical Characteristics

- › Conventional hydraulic or servo-controlled
- › Press force range: 250 to 20.000 kN
- › Stroke lengths from 50 to 1.500 mm
- › Press table lengths up to 4.500 mm
