

STAMPING & FORMING^(HR)

Zeulenroda Presstechnik's powerful **Automatic Stamping and Metal Forming Presses (HR)** ensure maximum precision and efficiency for demanding stamping and forming processes.

Benefit from reliable technology, high productivity, and sustainable performance - even under the most demanding production conditions.

Features

- › In-house manufacturing with certified welding shop
- › Highly rigid press frame - monoblock or split tie-rod version
- › Adjust-in-Motion System & Quicklift
- › Integrated press monitoring

Product page

Applications

- › Small to large formed parts
- › Sheet thickness from 0.2 to 8 mm

Industries [Selection]

- › E-Mobility & Electric motor lamination
- › Automotive
- › Construction & Sanitation
- › Aerospace
- › Household & Consumer goods

Technical Characteristics

- › Press force range 400 to 8.000 kN
- › Configurable up to 600 strokes/min
- › Press table length 4.500 mm
- › Eccentric, crank or servo drive

Individual press configuration

- › Tool change & Tool clamping system
- › Transfer systems
- › Strip & Coil handling systems
- › Robotic loading
- › Roll feed systems
- › Conveyour belt systems
- › Scrap disposal systems
